

Redfish LEAD Grade 6

Grade 6 2019-2020 & Grade 7 2020-2021

Vision

- ◆ Technology & Maker space
- ◆ Environmental Stewardship/ sustainable living/
 - ◆ place conscious learning
 - ◆ Community-Based Mentorships
- ◆ Leveraging what we already do well: strong academics, Project WILD School, outdoor programming, personalized learning

LEAD: Learn, Explore, Adventure, Discover

We will work together on a big project – maybe a green house, maybe a chicken coop, maybe a gazebo?

We will study the ecology of our spawning stream and lake, see where we can improve our local habitat, and learn more about how our environment is changing.

We will work with community mentors to learn more about what we are passionate about: cooking, woodworking, adventure tourism, jewelry making, entrepreneurship—our students will help shape the options...

As the seasons change, so will our focus. One day per week, our students will have time to delve into group and individual inquiry-based projects.

If you are interested in this innovative leadership opportunity for your grade 6 student, please email Principal Victoria McAllister: vmcallister@sd8.bc.ca

Out of catchment deadline: March 29
