# Long Range FACILITIES PLANNING

School District No. 8
Public Presentation #2
**December 2, 2014**
Kaslo

Board's Visioning

- Why is a facilities plan necessary? What should it accomplish?

  - Provide best learning environment for students

  - Sustainability and stability

  - Renewal

  - Better, more pro-active delivery of services to students and stakeholders

  - More competitive, effective organization

  - Provide best workplace for employees

  - Lower the cost of ownership

  - Transfer of $$ from operations & capital to classrooms

  - Other

A credible strategic facilities plan <u>should not</u> focus on a specific outcome or preconceived solution

Key Stages

| Understanding	Analyzing	Planning	Acting
District Goals	Data	Decision Making	Implementation
Student Expectations	Scenarios	Phasing	Feedback
Achievement Gaps	Learning Impact	Flexibility	Evaluate
Departmental Strategic Plans	Business Case		Adjust
Existing Facilities			

Data – What do we know about SD8?

Inventory

- 91,900 square metres

- Schools
  - 13 Elementary Schools
  - 4 Secondary Schools
  - 3 K-10 or K-12 Schools
  - 1 Middle School
  - 3 Programs of Distributed Learning in 5 sites
  - 4 Learning Centres

- Administration Sites - 6

- Closed Sites – 7

- Vacant Land - 4

Funding

- Capital upgrades are funded three ways:

1. Ministry of Education/Minister of Finance major capital money (scarce)

2. Annual Facilities Grant ($1.3 million/year; unable to carry forward)

3. Operating funds ($4.69 million budget 14/15)

Facility Condition

- VFA is a contractor for the Ministry of Education
  - Performs a cycle of facility audits
  - Maintains database of all assets

- VFA audited SD8 in June 2014

- Industry perspective

- Need operations crew critical eye to challenge VFA data

- Annual Facilities Grant spending is now tied to this data

Facility Condition Index

- **Facility Condition Index:** the lower the better condition your building

- FCI =   Deferred Maintenance Costs ("Requirements")
            Cost to Rebuild ("Replacement")

- Deferred Maintenance Costs = future repairs to keep asset functioning

- Replacement = cost to build "like kind"

- NOTE: MOE replacement likely would not rebuild exactly what we have now; would replace at current design build standards per the capital branch

Critical Failures

- With so many immediate needs and limited capital funding, SD8 experiences critical failures and lost instructional days due to school closures:

Site	Issue	School Year	Number of Days of Instruction Lost	Approx. Cost
Blewett Elementary	Sewer system failure	2012-2013	0	$80,000
WE Graham Elementary	Water supply failure	2013-2014	2	$10,000
WE Graham Elementary	Propane tank valve failure	2012-2013	1	$2,000
Jewett Elementary	Sewer system failure	2013-2014	1	$2,500
Jewett Elementary	Propane failure	2012-2013	2	
Hume Elementary	Activity room mold	2012-2013	0	$180,000
Yahk Elementary	Sewer system failure	2013-2014	2	$7,500
Trafalgar Middle School	Plugged storm drain #1	2012-2013	0.5	$25,000
Trafalgar Middle School	Plugged storm drain #2	2013-2014	0	$1,000
Trafalgar Middle School	Boiler coil failure	2010-2011	Partial site restriction	$3,000
Winlaw Elementary	Water supply failure	2013-2014	2.5	

$311,000

- $50.4 million of the $52.7 million in deferred maintenance costs = systems beyond their useful life = more critical failures.

System Group and Priority	1- Immediate	2- Short Term	3- Long Term	4- Recommended	5- Does Not Meet Current Codes / Standards	Total

Total Deferred Maintenance Costs per Square Metre

Adding Value with Facilities Planning

1. Human resources

2. Direct service to students

3. Investment in asset base

4. Improve physical learning environment
School Facilities that Support Operations

- Flooring – no carpet; concrete floors/terrazzo

- Envelope – concrete block, metal cladding, insulated roll shutters

- Mechanical – Large with ease of access, heated slab, classroom ventilators and air handlers to augment, high efficiency boilers, geothermal, remote access

- Custodial – built in vacuum, drop lighting, standard water temperature, classroom regulated heat, sufficient size closets with floor sinks, washable paint, concrete washroom surfaces

- Technology – dedicated communication room, multiple drops in classrooms, cooling in server rooms, fibre links, cable trays, hardwired clocks, audio systems in all rooms

- Electrical – large room with ease of access and cooling, generator backup, cable trays and conduit, redundancy, LED & T5 lighting (dimmable), occupancy sensors, remote access

- Roof – flat roof, interior access, limited skylights, limited roof penetrations

School Facilities that Support Learning

Ideas for today and tomorrow

Organizing for Learning

Formal Teaching

Physical Learning Environment

Informal Learning

Individual

The Future of the physical Learning Environment: School Facilities that Support the User (2011)

Dynamic Learning Spaces

- Flexible furniture solutions

- Context-driven

- The notion of "classes" and "class size" will morph into organization for learning; learning spaces need to be flexible in order to accommodate this shift

- Seamless access to technology

- Emphasis on many ways to organize – individual, in groups, working spaces, collaboration spaces

- Break-out spaces to provide "retreat" time for individuals or small groups

- Dispersed learning environments within the school building, and throughout the community

- Mobility options for students and staff (online learning environments, access to business operations and functions)

- Mobility options for staff and students allow us to think 'outside of school walls' – creating options for virtual and physical attendance

- Do all programs need classroom space? As we recognize community partnerships as critical to learning, how does this impact our space design?

Community Partnerships – Shared Spaces

- Facilities need to reflect the local context; districts need to be prepared to understand that a facility that serves one community well, may not necessarily be replicated with success in other communities

- Community Service Organizations who work closely with schools may be co-located in school buildings

- Public libraries and school libraries often duplicate services; can they co-locate and service community and schools?

- Can more than one program – with different pedagogical perspectives, be located in one facility?

Guiding Principles in Action

What's happening in your schools?

The Nature of Learning

The LEARNER at the center

Learning is SOCIAL

EMOTION plays a Key Role in Learning

INDIVIDUAL DIFFERENCES matter in Learning

ALL Learners need CHALLENGE

Learners need CLARITY and MEANINGFUL FEEDBACK

Learners need to see CONNECTIONS

SD8 Kootenay Lake: Refresh, Repurpose, Reinvent?

Susanne Maguire
Teacher
School District 8
November, 2014

"Alongside quality teaching and purposeful leadership, decent school environments inspire pupils to give their best and properly enable our teachers to teach."

T. Goddard, Director, British Council for School
Environment

Some images and information to inspire...

Trends Affecting School Environment

Of the many changes underway in education, **two trends** in particular are revolutionizing the design of the learning environment:

*The shift from the teacher as a "sole practitioner" to interactive team teaching

*The recognition that students have a variety of learning styles requiring varied and flexible learning situations.

Each of these trends poses significant challenges to the design of the learning environment—and in turn opens up broad opportunities for innovation.

# Environmental Impacts on Academic Success

Research by University of Salford, England, 2012

Classroom environment found to have a **25% impact on student performance**
- 6 out of 10 parameters had a significant impact. They are:
- Light – 12%
- Choice – 10%
- Complexity – 17%
- Colour 18%
- Flexibility – 17%
- Connection – 26%

The fundamental building block of almost every single school in this country is the classroom.

Who seriously believes that locking 25 students in a small room with one adult for several hours each day is the best way for them to be "educated"?

In the 21st century, education is about project-based learning, connections with peers around the world, service learning, independent research, design and creativity, and, more than anything else, critical thinking and challenges to old assumptions.

...structures will be "learning communities" characterized by adaptable spaces, small learning groups, new technologies, and environments conducive to both contemplation and interaction.

10 Things in School That Should Be Obsolete

1. Computer Labs
2. Learning in prescribed places
3. Teacher-centred classrooms
4. Isolated classrooms
5. Department organization
6. School Corridors
7. Traditional school libraries
8. Dark, indoor gyms
9. Institutional food service
10. Large restrooms

http://blogs.kqed.org/mindshift/2012/07/10-things-in-school-that-should-be-obsolete/

Don't Just Rebuild Schools Reinvent Them

Create personalized learning communities

Make technology ubiquitous

Connect with the outdoors for health, fitness, and improved academics

Focus on student comfort.

Treat teachers like professionals.

Engage parents and the community.
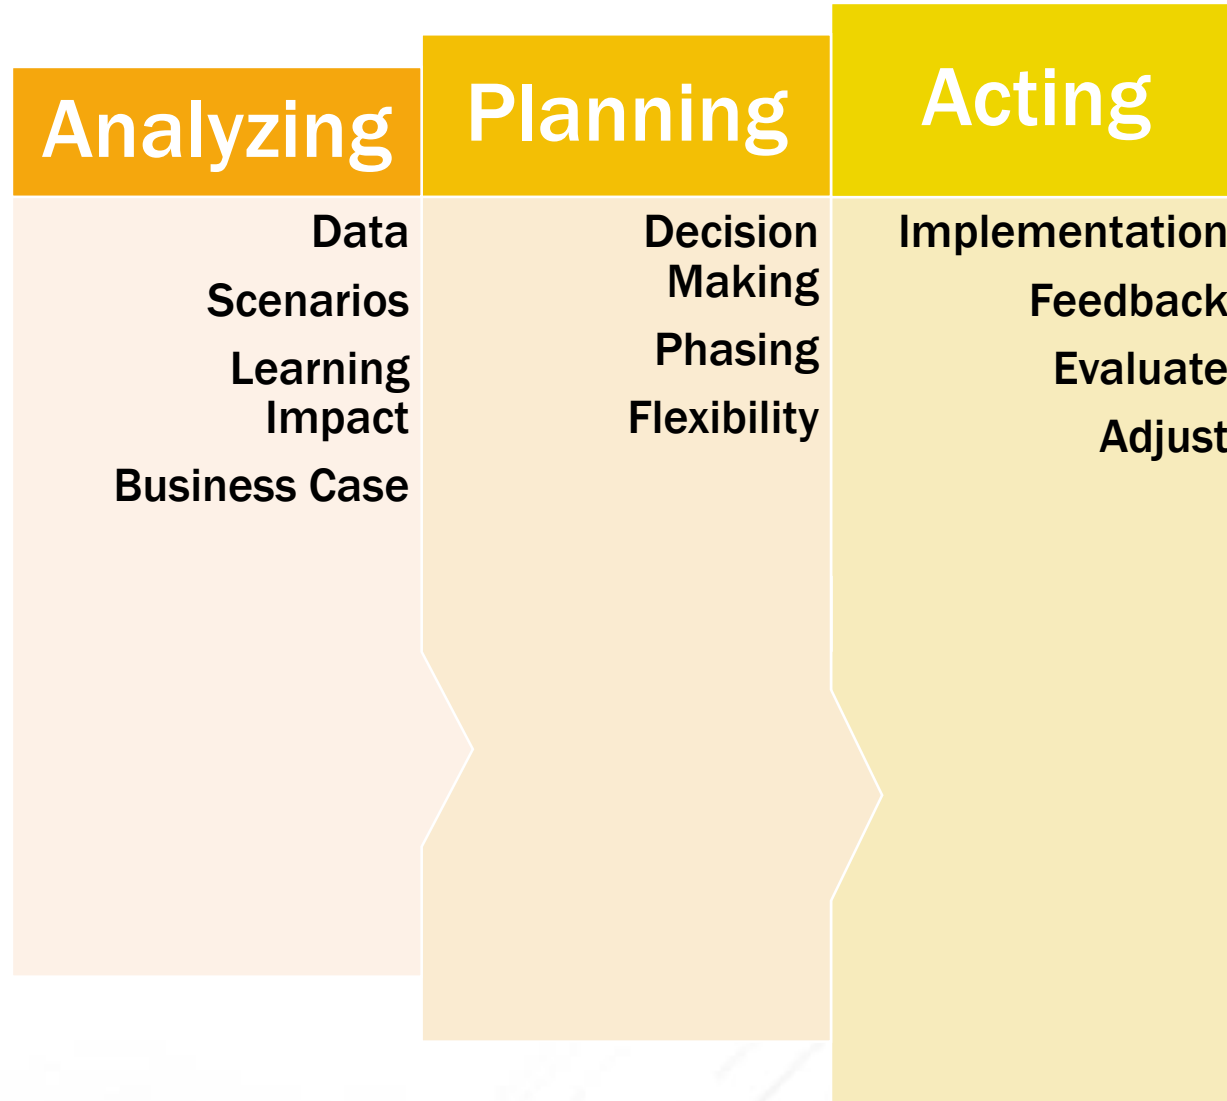

http://www.fieldingnair.com/Press/Education_Week_

"Because architecture can facilitate the transmission of cultural values, we need to look at what our present school buildings are saying to our children. We expect schools to prepare children for living in a democratic society, yet we provide a learning environment that resembles a police state – hard, overly durable, fenced…"

A. Taylor, 1993

"The principle goal of education is to create men who are capable of doing new things, not simply repeating what other generations have done – men who are creative, inventive and discovers."

Jean Piaget

Key Stages

Analyzing	Planning	Acting
Data	Decision Making	Implementation
Scenarios	Phasing	Feedback
Learning	Flexibility	Evaluate
Impact		Adjust
Business Case		

Scenarios

- Otherwise knows as options, ideas, variations

- Challenges status quo to add value to the system

- We need you to think about what options the Board should consider

Scenarios

Re-Configuration

- Addresses areas of growth pressure (Winlaw/Blewett)

- May not involve closure

- May better meet learner needs

- If no closure, may or may not save money to add value to student learning

Closure – School or Space

- Involves closure of a building or space within a building

- Saves money (staffing, utilities, deferred maintenance costs) to add value to learning environment and direct service to students

- Unloads future liability by unloading capital costs

Scorecard

- Way by which to measure one scenario against another

- Business case approach, not merely cost driven
  - Long term view
  - Linked to student expectations and goals
  - Optimizes asset use
  - Organizational performance

Group	Individual Criteria	Reference	Weight
SD8 Facilities Plan			
Evaluation Criteria			
Weighting: 50% Board, 25% PVP, 25% Senior Leadership - 2014 09 08			
Economic	1. Minimize total net capital costs over planning horizon	Basic	9%
22%	2. Minimize total initial capital expenditure	Basic	5%
	3. Minimized total operational cost over planning horizon	Basic	9%

19%	13. Maximize potential partnership opportunities	Principle	5%
	14. Minimize implementation risks	Basic	3%
	15. Minimize disruption due to construction projects	Basic	2%
	16. Maximize the potential for broad community acceptance	Basic	3%

Other Considerations

- Strong starts

- Tenants

- Catchment

- Transfer policy

- Transportation

- Disposal of property

- Funding line items like small community supplements

- Existing partnerships

- Distributed learning in South Creston and Central Elementary Schools

Next Steps

- Give us feedback on the data – is there more you need to know?

- Give us your ideas for scenarios by January 5, 2015

- How to submit?

  - Email facilities@sd8.bc.ca

  - Fax 250-352-6686

  - Mail 570 Johnstone Road, Nelson BC, V1L 6J2

Thank you!
