

Student Performance and Achievement Trends

2021-22 Summary of Key Findings for Grade-to-grade Transitions

Grade-to-grade transitions indicate that SD8 is on par with the provincial average.

However, students with Indigenous ancestry continue to fall behind their peers by an average of 4% per year over a four-year average. This data indicates that closer attention should be paid to why students with Indigenous ancestry continue to have less success in transitioning to the next grade level. Students with diverse needs fall behind an average of 2% behind their peers in grade-to-grade transitions in the past four years.
